

# ASB OutdoorSquashCourt

Specification sheet

ASB has a proven long history and experience with squash court production and installation. Furthermore, ASB has gained extensive knowledge from the many outdoor ShowGlassCourt setups done in the course of the company's history. From this background ASB has developed a new type of squash court for the outdoor use. The aim is to offer more people access to squash courts and to recruit new squash players as well as to create more awareness of our great sport.

## HOW DOES IT WORK?

Usually, squash is played in squash or leisure centres, schools, universities, or at other squash related venues. But is the unusual possible? What about playing squash outdoors? This is possible, but it needs the right venue and appropriate material to build a court that can withstand all outdoor conditions such as the weather as well as many other influences that every publicly accessible installation faces. Bringing squash outdoors and making it more accessible and visible will give the sport a better image and more attention.

## ADVANTAGES

- Minimal maintenance
- Fast installation
- The court can be moved from one location to the other
- Outdoor placement
- Simple site preparation
- Durability and resistance

# ASB Outdoor Squash Court

Specification sheet

## SPECIFICATION

### Foundation

- no need for a building
- a flat area of roughly 12 x 10 metres needed
- has to withstand the court load

### The Structure

- steel frame
- powder coated resistant anti-corrosive surface treatment
- stability and safety: certified to withstand a hurricane

### The Walls

- made of specially designed HPL board assuring the proper ball rebound
- UV protected
- highly durable to sustain the constant squash ball hitting and rough outdoor conditions
- different colours

### The Floor

- customized sports floor tiles
- resistant paint for marking lines
- different colours

## OPTIONAL

### Lighting

- optionally the outdoor court can be fitted with lights

### Cover

- the court can be used even in rainy weather when equipped with a cover/roof

### Overall appearance

- the court can be fitted to different environments (leisure setup, industrial setup), which is a subject to individual design
- weather resistant
